

SecureShare — UI/UX Design System Specification

Design Tokens, Component Library, Glassmorphism Styling & Responsive Layouts

Author: Arjun Rao (UI/UX Engineer) | Version: 1.0.0 | Framework: React 18 + Tailwind CSS

1. Design Principles & Goals

- Security Clarity: High-visibility visual indicators for file quarantine, encryption, and audit status.
- Modern Glassmorphism: Frosted glass panels (backdrop-blur-md, bg-white/80, border-slate-200/80).
- Strict Accessibility: Conformance with WCAG 2.1 Level AA color contrast and keyboard navigation.
- Real-Time Feedback: Instantaneous visual feedback for upload progress, threat scanning, and permission updates.

2. Color Palette & Design Tokens

The SecureShare color palette establishes clear semantic visual hierarchy:

Token Name	Color Value (Hex)	Semantic Usage Description
Primary Brand	Indigo-600 (#4F46E5)	Interactive buttons, active tabs, brand accents
Surface Dark	Slate-900 (#0F172A)	Header navigation, terminal consoles, code snippets
Surface Light	Slate-50 (#F8F AFC)	Global application background, clean reading surfaces
Success / Clean	Emerald-500 (#10B981)	Clean scan status, verified audit chains, active MFA
Warning / Threat	Amber-500 (#F59E0B)	Expiring links, elevated entropy warning, login notices
Danger / Quarantine	Rose-600 (#E11D48)	Malware intercepted, quarantined file tag, account lockout

3. Typography Hierarchy

- Primary UI Font: Inter / Segoe UI (system-ui, -apple-system, sans-serif).
- Code / Cryptographic Font: Fira Code / Consolas / Monaco (monospace) for SHA-256 hashes, tokens, and IVs.
- Heading 1: 24px (1.5rem), font-bold, tracking-tight, text-slate-900.
- Body Text: 14px (0.875rem), font-normal, text-slate-600.
- Micro Copy / Labels: 11px (0.6875rem), font-medium, uppercase, text-slate-400.

4. Core Component Architecture

- AppShell (components/layout/AppShell.tsx): Unified responsive layout featuring top brand navigation, user profile switcher, role badge (ADMIN/AUDITOR/USER), and breadcrumb navigation.
- ScannerProgressModal: Multi-stage visual stepper detailing the 6 threat scanning phases with animated checkmarks.
- FileCard & FileList: Tabular and grid presentation showing MIME icons, encryption status badge, file size, and quick action buttons.
- HashChainVisualizer: Interactive block viewer illustrating previous hash and current hash linkage for audit records.

5. Key Screen Layouts & Route Mapping

- /dashboard: Overview cards (Total Files, Encrypted Storage, Quarantined Threats, Security Score).
- /upload: Drag-and-drop zone with MIME pre-flight check, size indicator, and scan telemetry.
- /files: Hierarchical folder browser with breadcrumbs, multi-select, and granular permission sharing modal.
- /shares: Active expiring links table with copy-to-clipboard, download limit status, and revoke button.
- /demo: Comprehensive live presentation dashboard featuring 8 summary metrics cards, 9-stage pipeline diagram, and one-click quick switch between all 6 personas.
- /admin/dashboard: SOC command center with real-time attack telemetry, quarantine purge actions, and audit verifier.
